Insights

- **Crimes Against Women Are Rising**
  Reported cases steadily increased from 2001–2021, with domestic violence as the most common crime.
- **Gap Between Arrests and Convictions**
  Despite a high number of arrests, the conviction rate is only ~17.56%, highlighting inefficiencies in the justice system.
- **Regional Concentration**
  Highest cases occur in Uttar Pradesh, Madhya Pradesh, West Bengal, Rajasthan, Andhra Pradesh, and urban districts like Delhi, Hyderabad, and Ahmedabad.
- **Institutional and Legal Challenges**
  Low conviction rates, systemic delays, and inefficient investigations slow down justice.
- **Causes could be**
  Patriarchal norms, victim-blaming, and normalization of gendered violence increase women's vulnerability.
  Women from lower socio-economic groups, certain castes, or minority communities face higher exposure to crimes and reduced access to justice.

Proposed Solutions

- **Strengthen Investigation and Law Enforcement**
  Enhance police training, forensic capabilities, and gender-sensitivity to improve case handling.
- **Fast-Track Judicial Processes**
  Expand fast-track courts to reduce trial delays and case backlog.
- **Awareness and Reporting Initiatives**
  Promote public campaigns and accessible reporting channels to encourage victims to come forward.
- **Targeted Policies for High-Risk Areas**
  Implement regional safety programs in states and districts with high crime incidence.
- **Support for Marginalized Women**
  Provide legal aid, counseling, and victim rehabilitation, focusing on women from vulnerable communities.
- **Leverage Technology for Safety**
  Use surveillance systems, mobile safety apps, and emergency response tools to prevent crimes and enable faster action.
- **Systemic Reform and Coordination**
  Improve coordination between police, courts, and social institutions, and address structural bottlenecks to increase conviction success.
